La densidad o espesor de las telas de algodón se calcula con la unidad de medida “cotton count”. Cuanto mayor es el “cotton count”, más fino es el hilo, por lo que el número de hilos de la urdimbre* y de la trama* varía en función de cada tipo de espesor:

Fabric density or thickness is measured in “cotton count”. The highest the “cotton count”, the finest the thread, so the number of warp threads and woof threads is different depending on each kind of density:

La densité ou épaisseur des tissus est calculée en l'unité de mesure «cotton count». Plus grand est le «cotton count», plus fin est le fil, de façon que le numéro de fils de la chaîne* et de la trame* varie en fonction de chaque type d'épaisseur :
